¹IDEAL will attempt to bring the unit back into factory specifications for accuracy. If we cannot accomplish this, then repair or replacement may be necessary after informing the owner of the cost. A charge will be assessed to inspect the unit and attempt to bring it into calibration. If it cannot be calibrated to original factory accuracy, 50% of the cost of attempting to do so will be applied towards the cost to repair/replace.

²A NIST Traceable certification document will be included with the unit when returned to the owner.

Warranty claims will be determined upon receipt and inspection of the unit when included documentation of proof of purchase from an **authorized distributor** is included.

Contact customer service regarding obsolete items for possible technical assistance. Please refrain from simply filling out an RMA and shipping it to our service center.

Note: Customers assume responsibility for all shipping costs both to IDEAL and for the return of the unit back to them. Shipping by IDEAL back to the customer will be via ground shipping unless otherwise expedited upon approval by the customer. Validity of warranty claims will be determined upon receipt and inspection of the unit by IDEAL Service technicians. Valid warranty claims will result in no return cost for surface shipping back to the customer.

Any items left in our facility over 45 days will be deemed to be abandoned and will become IDEAL property. Return of unrepared, non-warranty product will be charged an inspection and handling fee of \$40 plus shipping.
